BATTERIE PER TRATTORINI
BATTERIES POUR TRACTEURS
BATTERIES FOR TRACTORS
BATTERIEN FÜR TRAKTOREN
BATERIAS PARA TRACTORES

Note: Attivazione delle batterie: - Rimuovere i tappi e versare l'acido fino a circa 10 mm sopra le piastre. - Lasciare riposare per circa 30 minuti per dar modo alle piastre di assorbire l'acido in modo uniforme. - Porre sotto carica con intensità di corrente pari a 1/10 della capacità in Ah (Ampere ora) della batteria. (Non utilizzare caricatori rapidi). - La batteria è carica quando in ogni elemento la densità dell'acido risulta uniforme e pari a circa 1,275 g x 1. - Far riposare la batteria per 30 minuti circa senza tappi, affinché fuoriesca il gas formatosi durante la carica. - Riconrollare il livello dell'acido e rabboccare con acido se necessario. - Rimettere i tappi e pulire, da eventuali tracce di acido. - Durante il montaggio della batteria posizionare prima il morsetto positivo e successivamente il negativo. A montaggio ultimato cospargere i morsetti di grasso. Avvertenze per la sicurezza: - Per evitare pericoli di incidenti, attenersi scrupolosamente a quanto segue: - L'acido contenuto nelle batterie è una soluzione di acido solforico, perciò una sostanza corrosiva. In caso di contatto con la pelle, con gli occhi, con il vestiario o con superfici verniciate lavare subito abbondantemente con acqua. Per gli occhi prestare anche cure mediche, tenere fuori dalla portata dei BAMBINI. - Le batterie generano gas esplosivi. Per evitare il pericolo di esplosione non avvicinarsi alle batterie con sigarette accese, né generare scintille che possono verificarsi nelle operazioni di montaggio, smontaggio o avviamento con collegamenti volanti mediante batterie od apparecchiature ausiliarie. - Quando si procede alla carica delle batterie, fare attenzione alla corretta polarità di collegamento con il caricatore, effettuare contatti sicuri per non produrre scintille. Evitare di utilizzare corrente di carica troppo elevata. Se la carica si effettua in luoghi ristretti, provvedere ad una adeguata ventilazione.

Notes: Basic rules for battery care and maintenance: Remove thin plastic seals and fill the cells with battery grade sulfuric acid up to 10mm over the plates. Leave it to rest for about 30 minutes. Connect the battery to the charger, charge it up with strength of charging current 1/10 amperes of the total capacity of the battery. (Do not use fast chargers) Stop the charge when the two voltage readings recorded two hours apart indicate no increase. Further charging would be useless and may damage the battery and shorten its life. Full charge is reached when acid gravity is 1,275g x 1. Leave it to rest for 30 minutes with no caps on to release the gas fumes. After the battery has been charged, the acid level should be rechecked and filled to the bottom of the vent well openings. Do not overfill. First fix the positive clamp and then the negative. Once the battery is charged, put grease on the clamps. Safety warning: Sulfuric acid is highly corrosive, it can cause severe burns. Batteries produce explosive gases. In case of contact with skin, eyes, clothing or painted surfaces flush immediately with water. Get medical help fast. Keep out of the reach of children. Keep sparks flames and cigarettes away from batteries. Always wear safety glasses and aerate the area straight afterwards.

BATTERIE CARICHE PRONTE ALL'USO LINEA TECNICA E HEAVY DUTY

BATTERIES CHARGÉES
 LOADED BATTERIES
 GELADENE BATTERIEN
 BATERÍAS CARGADAS

Note: Le batterie dalla 45AH alla 100AH inclusa sono provviste di: • COPERCHIO CON DEGASSIFICAZIONE CENTRALIZZATA, un sistema di convogliamento centralizzato per garantire una sicura fuoriuscita dei gas. • DISPOSITIVO FLAME ARRESTOR che evita i ritorni di fiamma tramite l'utilizzo di due pastiglie microporose posizionate nei punti di fuoriuscita dei gas • IDROMETRO OTTICO che indica lo stato di carica della batteria e il livello dell'elettrolita Le batterie dalla 120AH hanno un'ottima resistenza alle vibrazioni e ai cicli di carica e scarica. Sono provviste di: • PIASTRE CON TECNOLOGIA IBRIDA per garantire maggiore durata • SEPARATORE A BUSTA per evitare corti circuiti. • GRUPPO PIASTRE CON INTASATORI per resistere alle vibrazioni

Notes: Loaded batteries ready to use. Batteries from 45AH to 100AH (TECNICA line) are provided with: • COVER WITH CENTRALIZED DEGASSING, a centralized conveyor system to grant a safe gas emission • FLAME ARRESTOR SYSTEM, which avoid the backfires, using two micro porous pastes, that are positioned in the gas emission points • OPTICAL HYDROMETER, which indicate the battery charge level and the electrolyte level Batteries from 120AH (HEAVY DUTY line) have a good resistance to the vibrations and the cycles of charge and discharge. are provided with: • PLATES WITH MIXED TECNOLOGY to grant more duration • ENVELOPE SEPARATOR to avoid short circuits • STRAW PRESS PLATES to endure the vibrations

NEUTRALITE

NEUTRALITÉ
 NEUTRALITY
 NEUTRALITÄT
 NEUTRALIDAD

Caratteristiche: NEUTRALITE é un prodotto registrato e brevettato per l'assorbimento e la neutralizzazione dei liquidi acidi, nello specifico, per l'acido solforico (H2SO4, utilizzato normalmente in tutti gli accumulatori, elettrolito alla concentrazione del 36% (batterie). Come prescritto dalla legge n. 308 del 15 Dic. 2004 (art. 195 comma 2, lett. S) e n. 152 del 3 Apr. 2006 (Art.195 comma 2 lett. Q) e dal D. Lgs. N.20 del 24 Gennaio 2011 del Ministero dell'Ambiente e tutela del territorio

Features: NEUTRALITY is an effective neutralizer / absorbent great for solving problems caused by the accidental spill of sulfuric acid, and at the same time giving rise to a mixture of natural non-hazardous for those who absolutely must utilize.E' effective also on all other acids (hydrochloric, nitric, phosphoric, formic, etc..) and can be used as an absorbent in case of spillage of caustic bases well, such as sodium hydroxide, sodium hypochlorite etc.. For this neutrality, has been certified, as required by D.LGS.n. 20 of January 24, 2011, by the University of Turin Department of Analytical Chemistry. The use of neutrality, immediately after the accident prevent serious damage and preserves greets workers, the workplace and the environment.

LAMPEGGIANTE FLASH

FEU CLIGNOTANT FASK
BEACON
BLINKLEUTCHE
BOMBILLA FLASH

Corpo:

- Base in Polipropilene
- Calotta in Policarbonato
- O-Ring di tenuta fra base e calotta

Caratteristiche elettriche:

- Lampada allo Xenon 1J
- **Massima corrente assorbita:**

- 68,5 mA a 100 Vdc
- 37,6 mA a 24 Vdc
- 29,0 mA a 16 Vdc

Frequenza di lampeggio:

- 1,25 Hz a 100 Vdc
- 1,00 Hz a 24 Vdc
- 0,60 Hz a 12 Vdc

Body:

- PP base
- PV canopy
- O-Ring between base and canopy

Electrical characteristics:

- Xenon 1J bulb

Max absorbed current:

- 68,5 mA a 100 Vdc
- 37,6 mA a 24 Vdc
- 29,0 mA a 16 Vdc

Flashing frequency:

- 1,25 Hz a 100 Vdc
- 1,00 Hz a 24 Vdc
- 0,60 Hz a 12 Vdc

Note: PRESCRIZIONI PER L'INSTALLAZIONE: I pannelli possono essere amovibili, purché la loro installazione risulti stabile e sicura. I pannelli, per quanto più possibile, devono essere posti in corrispondenza del limite esterno degli ingombri a sbalzo. L'altezza massima dal suolo del bordo superiore dei pannelli non deve risultare superiore a 2,20m. I pannelli non possono sporgere dalla sagoma del complesso trattore-attrezzatura, né costituire sporgenza pericolosa rispetto alla parte quale sono applicati. Gli ingombri laterali a sbalzo dovuti alle attrezzature che superino la sagoma della trattore devono essere segnalati con i pannelli sia nella parte anteriore che posteriore dell'ingombro stesso. Configurazione A o B

Notes: INSTALLATION: Panels can be removable, provided that their installation is stable & secured. Panels must be fixed as close as possible to the outer limit of sizes by fits & starts. Upper panel border max. height from the ground must not be higher than 2,20m. Panels cannot protrude from the overall size of the combination tractor-implement, nor become dangerous in relation to the side they are fixed to. Side sizes by fits & starts, due to implements wider than tractor size, must be signalled by panels in both front & back part of the size (see picture "A" & "B")

 CUADRO CON 2 CARAS 165 X 165 MM. PARA CHAPA SUBSTITUTIVA

Note: PRESCRIZIONI PER L'USO - Il pannello può essere usato esclusivamente per targhe sostitutive provvisorie o targhe ripetitrici di macchine agricole semoventi o trainate e di macchine operatrici semoventi o trainate. Pannello a fondo bianco: - In caso di smarrimento, sottrazione, deterioramento e distruzione di targa, é consentita la circolazione del veicolo solo previa apposizione a cura dell'intestatario di un pannello a fondo bianco riportante le indicazioni contenute nella targa originaria. La posizione, la dimensione, nonché i caratteri di iscrizione, devono essere corrispondenti a quelli della targa originaria. (da Art.102 comma 2). ATTENZIONE: Dimensioni secondo D.P.R. 16/12/1992 nr. 495 Art. 258 Pannello a fondo giallo: - Per le targhe ripetitrici di rimorchi agricoli e di macchine operatrici trainate, occorre usare il pannello a fondo giallo; La posizione, la dimensione, nonché i caratteri di iscrizione, devono essere corrispondenti a quelli della targa originaria. (da Art. 260 - Art. 100 Cod. Str.)

Notes: INSTALLATION: Panel can be used exclusively for provisional substitutive nr.plates or repeating nr. plates for agricultural self-propelled & towed machines or self-propelled & towed operating machines. White background panel: In case of nr. plate loss, theft, deterioration & destruction, driving is allowed only prior fixing by the holder of a panel with white background, showing information on the original nr. plate. ATTENTION: position, size & type must correspond to the ones of the original nr. plate (Art. 102, paragraph 2) Yellow background panel: For repeating nr. plates of agricultural trailers & towed operating machines, a yellow background panel must be used. Position, size & type must correspond to the ones of the original nr. plate. (Art. 260 - Art. 100 highway code) ATTENTION: Sizes according to D.P.R. 16/12/1992 nr. 495 Art. 258

Caratteristiche tecniche: - Materiali: Corpo: polipropilene caricato minerale. Lente: vetro temperato. Parabola: zama metallizzata. Portalampade e Staffa: acciaio zincato. - Elevata protezione all'acqua, alla nebbia salina e alla polvere grazie a guarnizioni a tenuta ermetica e sigillanti al silicone. - Temperatura di utilizzo: -40°C +50°C. - Tutti i modelli sono bivoltaggio. - Lampadine: H3 12V - 55W (Art. 00299) oppure 24V - 70W (Art. 00446) fornite a parte

Technical characteristics: - Materials: - Body: Mineral polypropilene. - Glass: hardened glass - Parabole: metal zama - Bulb holder & bracket: galvanised steel- High waterproof resistance, in salty environment & dust, thanks to hermetic gasket & silicone sealers. - Working temperature: -40°C +50°C. - All models dual voltage - Bulb: H3 12V - 55W (AMA Part nr. 00299) or 24V - 70W (AMA Part nr. 00446) supplied on demand

TRASMETTITORE 2/4 CANALI 433 MHZ AM/FM 12/24 VAC/DC

EMETTEUR 2/4 CH 433 MHZ AM/FM 12/24 VAC/DC

TRANSMITTER 2/4 CH 433 MHZ AM/FM 12/24 VAC/DC

ÜBERSENDER 2/4 CH 433 MHZ AM/FM 12/24 VAC/DC

TRANSMISOR 2/4 CH 433 MHZ AM/FM

Note: Il trasmettitore è concepito per comandare automatismi di chiusura e sistemi d'allarme grazie ad una codifica ad altissima sicurezza (KeeLoq® Hopping code). Il codice inviato dal trasmettitore cambia ad ogni attivazione, evitando così il rischio della copia e della sua successiva riproduzione. Un sistema interno permette di mantenere sincronizzati trasmettitore e ricevitore. Il relativo ricevitore viene collegato, in sede di installazione, al meccanismo da comandare (cancello, porta del garage, serrande, tapparelle, tende, centrale antifurto, illuminazione, ecc.). Il ricevitore è in grado di apprendere e conservare nella memoria permanente il codice di serie e l'algoritmo di sincronizzazione di più trasmettitori. Lo stesso trasmettitore può essere memorizzato in più ricevitori e quindi assolvere più funzioni. Ogni trasmettitore è prodotto e venduto con un codice seriale di fabbrica differente ed infalsificabile. Il codice effettivamente trasmesso è ottenuto da un algoritmo che combina il numero seriale, il codice effettivamente trasmesso è ottenuto da un algoritmo che combina il numero seriale, un codice costruttore ed un numero di sincronizzazione.

Caratteristiche tecniche

N° tasti: 2 o 4

Alimentazione : 12 Vdc

Durata della batteria: da 12 a 18 mesi

Tipo batteria: 23A - L1028

Consumo di corrente : 25 mA

Frequenza di trasmissione : 433.92 MHz

64 Numero di combinazioni di codice: 2

Modulazione : FM/FSK

E.r.p. : 100÷200 µW

Portata in spazio libero : 150 ÷ 250 m

Temperatura di funzionamento : -10 °C ÷ +55 °C

Dimensioni : 81 x 46 x 16 mm

Peso : 40 g

Notes: The radiocontrol has been designed for the control of automatic closing systems and anti-burglar systems thanks to its very high security coding system. (KeeLoq® Hopping code). The code sent by the transmitter changes at every activation, avoiding any scanning and copying risk. A special algorithm allows to keep synchronised transmitter and receiver. The receiver which makes the activation, once received the transmitter code, has to be connected during the installation to the device to control (gate, garage door, rolling shutters, awnings, anti-burglar appliances, lighting). The receiver can store into the EEPROM a serial number, a manufacturer key and a synchronism algorithm of more transmitters. Each transmitter (or its different keys) can be stored into different receivers and hence can do more functions. Each transmitter is manufactured and sold with a different univocal serial number set-in-factory. The real transmitted code is the result of a special algorithm which combines a serial number, a manufacturer key and a synchronization number.

Technical specifications

Number of keys: 2 or 4

Supply : 12 Vdc

Battery duration: from 12 to 18 months

Battery type: 23A - L1028

Current consumption : 25 mA

Operating frequency : 433.92 MHz

64 Security Code combinations number: 2

Modulation : AM/ASK

E.r.p. : 100÷200 µW

Range in open space : 150 ÷ 250 m

Operating temperature : -10 °C ÷ +55 °C

Dimensions : 81 x 46 x 16 mm

Weight : 40 g

RECEPTOR DE POTENCIA 2/4 RELÈ 16A ALIM. 12/24 VAC/DC P/N

Note: Il ricevitore è un ricevitore supereterodina. E' stato concepito per comandare automatismi generici, grazie ad una codifica ad [®] altissima sicurezza (KeeLoq Hopping code). La frequenza e le tecnologie impiegate lo rendono conforme alle regolamentazioni europee in termini di radiofrequenza e di compatibilità elettromagnetica (CE). Il codice ricevuto dal trasmettitore cambia ad ogni attivazione, evitando così il rischio della copia e successiva riproduzione. Un sistema interno permette di mantenere sempre sincronizzati ricevitore e trasmettitore. Il ricevitore, dispone di 2 o 4 relè di uscita con contatti puliti del tipo NA e di uno con contatti NA /NC; può essere perciò collegato ad un qualsiasi tipo di meccanismo (fino a 4 dispositivi differenti). La memorizzazione dei trasmettitori si effettua sia mediante i tasti del ricevitore sia a distanza, per autoapprendimento, per mezzo dei tasti del trasmettitori. Tutti i ricevitori sono in grado di apprendere e conservare in EEPROM il codice di serie e l'algoritmo di sincronizzazione di più trasmettitori.

Tipo ricevitore Supereterodina

Frequenza portante 433,92 MHz

Frequenza oscillatore locale 6,6128 MHz

Modulazione AM/ASK - FM/FSK

Impedenza d'ingresso 50 Ohm

Larghezza di canale > 25 KHz

Frequenza intermedia 10,7 MHz

Sensibilità d'ingresso -115 dBm

Emissione dell'oscillatore locale < -57 dBm

Tensione di alimentazione 12 - 24 Vac-dc

Consumo max 200 mA @24 Vac 260 mA @12 Vac

Potenza massima applicabile ai contatti dei relè 3,5 KW / 230 Vac

N° max codici utente 85

Temperatura di funzionamento -20°/+70°C

Grado di protezione IP44

Peso 300 gr

Dimensioni (mm) 140 x 115 x 52

Notes: The receivers are superheterodyne. The product has been designed for the control of automatic systems, thanks to its very high security coding system (KeeLoq [®] Hopping code). The operating frequency is among the European harmonised frequencies; the product fully complies with the EMC European Regulations (CE). The code sent by the transmitter changes at every activation, avoiding any scanning and copying risk. A special algorithm allows to keep synchronised transmitter and receiver. The receiver, which makes the activation, once received the transmitter code, has to be connected during the installation to the device to control. The receiver has 2/4 output relays, with NO (Normally open) and NO/NC (Normally open and normally closed) contacts. It can be connected to any type of appliance. The user codes can be memorised both with the receiver buttons and, via radio, in self-learning, using the transmitter keys. All the receivers Series can manage the serial number and the synchronisation algorithm of many transmitters.

Receiver type Superheterodyne

Carrier frequency 433.92 MHz

Local oscillator frequency 6,6128 MHz

Modulation AM/ASK - FM/FSK

Input impedance 50 Ohm

Channel length > 25 KHz

Intermediate frequency 10,7 MHz

Input sensitivity -115 dBm

Local oscillator emissions < -57 dBm

Power supply 12 - 24 Vac-dc

Consumption 200 mA @ 24 Vac 260 mA @12 Vac

Max applicable power at relay contacts 3,5 KW / 230 Vac

User codes max 85

Operating temperature -20°/+70°C

IP Grade IP44

Weight 300 gr

Overall dimensions (mm) 140 x 115 x 52

Selflearning radio memorization yes

AUTORADIO PIONEER
AUTORADIO PIONEER

Note: Caratteristiche Tecniche:

Sintolettore CD, di musica WAV, WMA, MP3 e contenuti del tuo dispositivo USB portatile grazie all'ingresso frontale USB. Aux-in frontale. Illuminazione dei tasti Rossa. Muting per radiotelefono cellulare. Potenziato dall'amplificatore 4x50W Mosfet. Visualizza 1 riga di testo di 10 caratteri, facilitando e velocizzando il cambio di stazione radio o l'accesso a file, cartelle o sottocartelle di musica. Con 1 uscita pre-out RCA posteriore questo modello aumenta la flessibilità di allestimento dell'audio in auto, consentendoti di ampliare il sistema, ad esempio con un amplificatore o diffusori aggiuntivi. Sintonizzatore AM/FM (24 stazioni memorizzabili). Frontalino Estraibile. Ingresso per cavi del telecomando a volante. Sintonizzatore RDS adattativo (PI, PS, AF, P/TA). Aggiornamento situazione traffico. BSM (ricerca automatica delle emittenti con miglior ricezione). Ricerca Automatica Frequenza Alternativa. Ricerca della Frequenza Automatica/Manuale.

Notes: Whether it's the radio, your CD

collection, MP3, WMA or WAV music – or even content from your portable USB device, it guarantees pure sound. Powered by our renowned MOSFET 50W x 4 Amplifier (which offers optimal levels of performance with minimal distortion), it also benefits from our unique Advanced Sound Retriever (ASR) technology. ASR automatically restores the sound quality, staging and density which was lost during the audio compression process. This means that your compressed music files are restored to their original quality; what you hear is truer to the original. its displays has 1 line of text with 10 characters, making navigation across radio stations or access to music folders, subfolders and files easier and faster. With 1 RCA Pre-out, the radio adds flexibility to your in-car audio setup, enabling you to expand your sound system with an additional amplifier or speakers, for example.
